

## **Dr. Wiesner Test & Automation**

We are a subsidiary of one of the German leaders in test and automation technologies, Dr. Wiesner Steuerungstechnik.

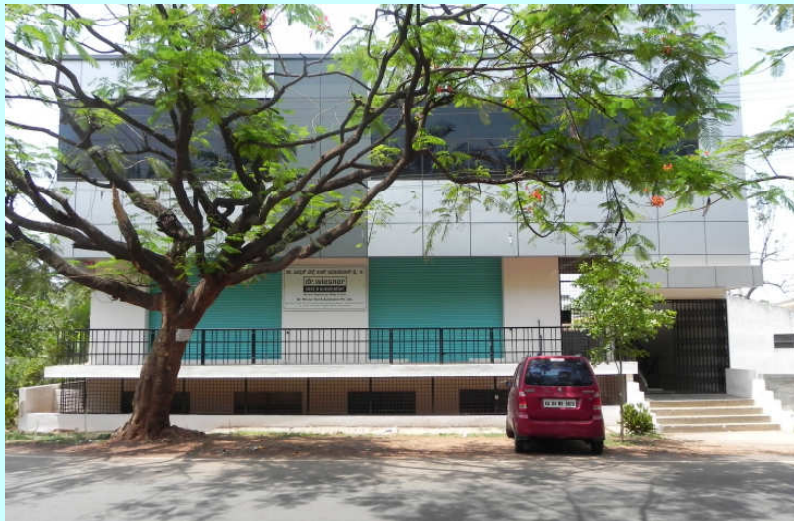

Supported by a experienced team of German engineers, we develop, design and build test- and assembly equipment for industrial manufacturing in all branches.

The range of our products covers industrial measurement and test devices with the focus leakage and flow measurement with or without fixture, manual working places up to fully automated test- and assembly stations.

Our team of Indian and German engineers has comprehensive knowledge about the requirements of the local and the European industry.

The usage of Indian an European resources and components guarantees high tech development of best fitting solutions for the Indian market with German quality to Indian costs.

German based project management ensures in time delivery of customised solutions with high productivity for the advantage of our customers.

In our new building in Bangalore we have a large and well equipped production area with all resources to develop and deliver complete machines.

Our position in Peenya, one of Asia's biggest industrial areas, gives us very high flexibility and perfect access to sub-suppliers and vendors and allows us to choose the best manufacturing methods and to increase our capacity depending on the demand within a short time.
